

MADHUSHREE B S

📍 Mysore , India | 📞 7795230661 | ✉ madhushreebs2004@gmail.com | 🔗 [LinkedIn](#)

PROFESSIONAL SUMMARY

Electronics and Communication Engineering undergraduate with a hands-on experience in embedded systems, microcontroller programming, PCB design, and electric vehicle technologies. Skilled in C, Python, MATLAB, and hardware interfacing, with practical exposure to Battery Management Systems (BMS), CAN communication, and EV powertrain architecture.

EDUCATION

- **Maharaja Institute of Technology Thandavapura** 2022-2026
B.E. in Electronics and Communication Engineering|CGPA:8.47/10
- **Jawahar Navodaya Vidyalaya Mysore** 2021-2022
12th Standard | 72 %
- **Jawahar Navodaya Vidyalaya Mysore** 2019-2020
10th Standard | 78 %

TECHNICAL SKILLS

- **Programming Languages:** C, Python
- **Embedded Systems:** Arduino, Microcontrollers, Sensor Interfacing
- **EV Technologies:** Battery Management System (BMS), EV Powertrain, Charging Systems
- **Design & Simulation Tools:** MATLAB, Proteus, PCB Design, Cadence, Scilab, Arduino IDE

INTERNSHIP EXPERIENCE

- ❖ **VisionAstraa EV Academy | EV Technology Intern** | Feb 2026
 - Studied EV architecture, battery technologies, battery pack design, and BMS.
 - Learned EV motors, controllers, charging systems, and CAN communication.
 - Gained hands-on exposure to embedded systems and automotive electronics.
- ❖ **Artificial Intelligence & Machine Learning Intern** | Jul 2024
 - Learned machine learning fundamentals and Python-based AI applications.

PROJECTS

- **Automatic Plant Watering System**
Designed a soil moisture-based automated irrigation system using sensors and a microcontroller.
- **Smart Battery Management System (BMS)**
Developed a Smart Battery Management System to monitor battery voltage, current, and temperature in real time. Integrated CAN communication and an OLED display for battery data monitoring and visualization.
- **Audio Steganography Using LSB**
Built a Python-based application to securely embed secret data within audio files using LSB techniques.
- **Traffic Light Controller**
Designed and simulated a traffic light control system using a microcontroller and Proteus software. Implemented timed sequencing of traffic signals using embedded C programming and timer concepts.

CERTIFICATIONS

- PCB Basic design course
- Arduino Training
- Python Fundamentals
- Artificial Intelligence and Machine Learning
